Professional Summary

B.Tech graduate in Computer Science and Business Systems seeking an entry-level opportunity in IT Support, Network Support or Service Desk operations. Possess foundational knowledge of computer networking, IP addressing, TCP/IP, DNS, DHCP and Windows troubleshooting. Interested in diagnosing connectivity issues, documenting technical problems and assisting users with hardware, software and network-related concerns.

Technical Skills

Networking: LAN, WAN, TCP/IP, OSI Model, IPv4, public and private IP addresses, static and dynamic IP addresses, subnet mask and default gateway.

Network Devices and Services: Routers, switches, Ethernet, DNS and DHCP fundamentals.

Troubleshooting: Basic Windows troubleshooting, Wi-Fi connectivity, internet connection issues, and hardware/software basics.

Command-Line Tools: Command Prompt, ipconfig, ping, tracert and nslookup.

Professional Skills: Communication, teamwork, problem-solving and willingness to learn.

Networking Project

Basic Network Troubleshooting Lab *Practice Project*

- Practiced checking network configuration using the Windows `ipconfig` command.
- Used `ping` to test connectivity to a network device or reachable host.
- Explored `tracert` to understand the route taken by network traffic.
- Studied DNS resolution using `nslookup` and reviewed common internet connectivity issues.
- Learned a basic troubleshooting sequence for checking Wi-Fi, IP configuration, gateway connectivity and DNS-related problems.

Tools: Windows Command Prompt and basic networking utilities.

Education

Bachelor of Technology (B.Tech) 2022–2026
Computer Science and Business Systems (CSBS)
Oriental Institute of Science and Technology, Bhopal, Madhya Pradesh

Relevant Technical Knowledge

- Basic understanding of IP addressing and network communication through routers and switches.
- Understanding of the roles of DNS and DHCP in network communication and IP configuration.
- Foundational knowledge of the OSI and TCP/IP models.
